

ELT-CW S421T Wedge Socket Load Pins

Euroload Limited have developed a range of stainless steel load pins to fit into Crosby S421T wedge sockets.

Pins fits exactly into existing wedge socket with no modification. Anti rotation bracket secures the pin in the correct orientation.

All dimensions as per Crosby S421T wedge socket.

Standard output is Millivolt per volt. Other output options include, RS 485, 4-20 ma, 0-10 VDC or ELT24 telemetry. Accuracy +/- 1% of applied load. IP67 ingress protection.

We can provide telemetry wall mount displays, gateways, battery operated telemetry displays or many more.

Most sizes held ex stock Aberdeen.

Monitor load in the dead end of any rope with this easy to use load pin.
